

After the Interscan Schiffahrtsgesellschaft used Xbee natural fuel additive for almost three years on the ship M/V Paivi, it was given the interesting opportunity to compare cleanliness of sister ships tanks and to observe the enzymes efficiency.

We can appreciate the pictures taken by the shipping company Interscan of its **two ships M/V Paivi with Xbee and M/V Tim without Xbee.**

Both ships were operated until December 2014 with HFO 180 and switched to MGO on January 1st, 2015.

Following pages show the pictures and the great difference between the ships:

Engines and fuels guarantees:

▫ **Xbee** is recognized by some of the most important marine engines manufacturers.

▫ On the other hand, **Xbee** respects the European regulation EN 590 Diesel norm and CSR 500 IFO 380 norm.

Pictures of the M/V Tim without Xbee:

Here are the actual benefits Xbee users can expect:

- **No more fuel tanks cleaning**
- **Elimination of the bacteria in the fuel**
- **Reduction of the corrosion in the fuel tank**
- **Fuel filters get cleaner and separators workload is dramatically reduced**
